Software Engineer

Experience

Software Engineer

Salesloft -- May 2024 - September 2024

Here at Salesloft, a leading company in the sales field, I focused on creating, enhancing, and maintaining its service platform, specifically, the section related to automated communication with its customers, a section that thousands of people use every day. Here my primary tools included **React.js** with **TypeScript**, and **Jest**. I collaborated with a team of talented, experienced, and diverse developers, where effective communication was crucial in fulfilling my responsibilities.

Front-End Developer

Touch of Tech -- January 2024 - June 2024.

I worked with other software engineers, Jr's and Sr's, in developing and maintaining React.js applications and Front-End projects. During these months, I learned best practices and worked alongside professional and experienced colleagues.

Software Engineer

University of Colima. -- January 2023 - August 2023.

I was a member of the team responsible for managing all systems within the University of Colima. My role involved enhancing, creating, and maintaining the university's websites using a toolset that included **JavaScript**, **HTML**, **CSS**, **PHP**, **React**, and **MySQL**. One notable project I worked on was developing both the front-end and back-end of a website designed to help the University identify students with disabilities who had not been previously accounted for.

Personal projects

- FullStack Project with React.js, **MongoDB**, Node.js and **Tailwind**.
- Trivia Flag game page with React.js.
- Travel Website with Node.js.
- Cost of insurance calculators with React.js and Vue.js.
- And so on.

Education
